

AimScreen™

AimScreen™ is a single-step immunoassay designed for the qualitative detection of drugs of abuse in urine.

The screened results can be achieved at the collection site in just minutes, and the results stay accurate and readable for up to four hours. Results are so clear that they can be photocopied for a permanent record of the test.

↔ Store at room temperature

RELATED PRODUCT

In addition to our AimScreen™ products, Germaine Laboratories offers the **SafeCup™ All-in-One Drug Test Cup**, a completely new concept providing true "one-step" collection and testing in a single device.

Want to know more? Visit us online or call our customer service department for details.

Germaine Laboratories, Inc. has been at the leading edge of on-site instant testing technology since 1990. Many features from our other product developments have been incorporated into our new AimScreen™ Urine Drug Testing Devices.

AimScreen™ is manufactured to the highest quality standards utilizing both Good Manufacturing Practices (GMP) Requirements, as overseen by the FDA and the International Standardization Organization (ISO) 13485:2016. These certifications attest to the quality standards set and achieved for the manufacture of our entire AimScreen™ product line.

AimScreen™ eliminates the possibility of a 'false negative' by providing negative specific results that agree with GC/MS confirmation.
